

Looking to the Future – Quality Management and Sustainable Governance (Using LOGIQC QMS Platform)

Managing safety, quality and risk in healthcare is critical to achieving better health outcomes for patients. To achieve this, our systems need to be smart and sustainable and using technology is one way to help manage your increasingly busy practice. In this session we hear about the experiences of Practices that have implemented the LOGIQC platform to help manage Cornerstone and other compliance requirements - What have been the benefits, challenges and gains?

Part A

Speaker: Bret Mannison

Overview of the findings from those Hauraki PHO Practices that have contributed to a survey regarding their experience in using the software

Part B

Facilitator: Rosemary Gordon

Panel discussions with representation from some of the Practices
