

Rosemary Gordon, Quality Consultant – QualitySOS

Rosemary has worked in the primary care sector for the past 14 years, most of that time within the Primary Health Organisation (PHO) environment.

She currently works part-time as the Quality Co-ordinator at Auckland Eye, Remuera and as a private quality consultant.

Rosemary has worked with the LOGIQC Quality Management System since its introduction to New Zealand, firstly in ProCare PHO, then supporting the implementation of the product into PHOs, general practices and day surgery centres as a consultant for LOGIQC.

Rosemary now uses LOGIQC at Auckland Eye, and sees the huge value of LOGIQC when fully implemented and used as 'business as usual'. Rosemary states ' I do not know how we would manage without it!'
